EXPLANATION :

The added material claimed by the examiner is an explanation of the invention.

The two theories expressed in the invention has their proofs :

First theory : if you have two sources of pressure you can create a third source of pressure higher than the two sources by using these two sources .

Its proof is the pump or compressor working on valves (the cylinders and pistons linked to each other in the invention.)

Second theory : if you have two sources of temperature you can create a third source higher than the two by using these two sources.

Its proof is power cycle linked to the refrigeration cycle as expressed in the invention.
